# **Recommendation for Processing** and Application of **Through-Hole Capacitors**

#### **Soldering Process**

A preheating of through-hole WIMA capacitors is allowed for temperatures  $T_{\text{max}} < 100 \,^{\circ} \text{C}.$ 

In practice a preheating duration of t < 5 min. has been proven to be best.

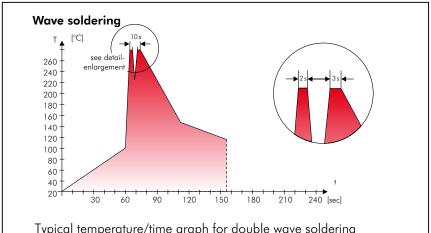

#### Single wave soldering

Soldering bath temperature:  $T < 260 \,^{\circ}\, C$ Immersion time: t < 5 sec

#### Double wave soldering

Soldering bath temperature:  $T < 260 \,^{\circ}\, C$ Immersion time: 2xt < 3sec

Due to different soldering processes and heat requirements the graphs are to be regarded as a recommendation only.

## ·WIMA Quality and Environmental Philosophy

#### ISO 9001:2000 Certification

ISO 9001:2000 is an international basic standard of quality assurance systems for all branches of industry. The approval according to ISO 9001:2000 of our factories by the VDE inspectorate certifies that organisation, equipment and monitoring of quality assurance in our factories correspond to internationally recognized standards.

#### **WIMA WPCS**

The WIMA Process Control System (WPCS) is a quality surveillance and optimization system developed by WIMA. WPCS is a major part of the quality-oriented WIMA production. Points of application of WPCS during production process:

- incoming material inspection
- metallization
- film inspection
- schoopage
- pre-healing
- lead attachment
- cast resin preparation/ encapsulation
- 100% final inspection
- **AQL** check

#### **WIMA Environmental Policy**

All WIMA capacitors, irrespective of whether through-hole devices or SMD, are made of environmentally friendly materials. Neither during manufacture nor in the product itself any toxic substances are used, e.g.

- Lead
- PBB/PBDE
- PCB
- Arsenic
- Cadmium
- Hydrocarbon chloride
- Mercury
- Chromium 6+

We merely use pure, recyclable materials for packing our components, such as:

- carton
- cardboard
- adhesive tape made of paper
- polystyrene

We almost completely refrain from using packing materials such as:

- foamed polystyrene (Styropor®)
- adhesive tapes made of plastic
- metal clips

#### **RoHS Compliance**

According to the RoHS Directive 2002/95/EC certain hazardous substances like e.g. lead, cadmium, mercury must not be used any longer in electronic equipment as of July 1st, 2006. For the sake of the environment WIMA has refraind from using such substances since years already.

Tape for lead-free WIMA capacitors

#### **DIN EN ISO 14001:2005**

WIMA's environmental management has been established in accordance with the guidelines of DIN EN ISO 14001:2005. The certification has been granted in June 2006.
